Super Oxygen-Rich Water!

Welcome to A New World
of Safe, Clean Water!

PurePro Royal® RS-108

A super quality 8-stage filter system comes with PurePro® Infra-red Filter, to cause resonance with water molecules. It ionizes and activates water molecules in our cells and blood thus improving our blood circulation and health condition. You get clean, safe, clear, healthy, great tasting water at every tap in your home.

- * Slim Line Design
- * Designer Faucet
- * Easy-Change Filter
- * Sanitary Safe
- * 100% Factory Tested

Royal RO Series - RS-108

PurePro water is healthy drinking water rich in minerals, purged of impurities, and ionized through alkaline, infra-red and mineral filter. PurePro Water is an excellent choice for healthy hydration. Not only does it taste great and refreshing, but it also helps you avoid impurities AND improve health !

Stage 1 - Sediment Pre-filter

This heavy duty sediment pre filter removes large particles such as: scale, rust, dirt and sand from the water.

Stage 2 - Activated Carbon Filter

The activated carbon reduces organic molecules and chlorine which gets rid of odor and improves the taste of your water.

Stage 3 - Activated Carbon Filter

The activated carbon reduces organic molecules and chlorine which gets rid of odor and improves the taste of your water.

Stage 4 - 100GPD RO Membrane

This membrane is the most essential stage in this filtering process. It filters out all harmful particles larger than 0.0001micron, leaving you with pure water.

Stage 5 - Post Carbon Filter

This stage ensures your RO water is clear of chlorine and organic molecules that negatively affect the taste and smell of your drinking water. Leaving you with fresh tasting water.

Stage 6 - Infra-Red Filter

This infra-red filter can activates water molecules in your body and improves oxygen level in your body. Warming and eliminating fats, chemicals and toxins from your blood.

Stage 7 - Mineral Filter

This cartridge replaces essential minerals that are good for you and make your water taste great.

Stage 8 - Alkaline Filter

This alkaline filter changes acidic RO water into a perfect alkalineionized water. Makes the water cleaner and healthier. Produces perfectly ph-balanced alkaline water, helps minimize the fluctuations of your body's pH.

Manufactured by :
PUREPRO WATER CORP., ILLINOIS, U.S.A.

Filter Lifetimes:

- **Pre-filters** (RS300ST / RS300ND / RS300RD) : **6 months**
- **Post filters** (Carbon, Infra-red, Mineral, Alkaline filter) : **1 year**
- **RO membrane** (TW30-1812-100) : **2 years**

NOTE: Regularly (i.e. once per month) check your TDS* level of feed water and purified water. Results will keep you updated about the filtration efficiency and the filter condition. RO membrane should lower TDS value of the feed water by around 90%. If the TDS level of purified water is out of range the pre-filters, post filters, and membrane should be replaced.

*TDS (Total Dissolved Solids) - total content of substances dissolved in water measured in ppm (parts per million - mg/l)

Filter Replacement Date Chart

RS-108	Value Pack	Installation Date				
Stage 1	 <p>(RS-3PK)</p>					
Stage 2						
Stage 3						
Stage 4	 <p>(100G-PK)</p>					
Stage 5	 <p>(RS-4PK)</p>

Stage 7						
Stage 8						

© PUREPRO USA CORP. ILLINOIS, U.S.A.

Reverse Osmosis (RO) drinking water systems include mechanical filtration to remove particles, carbon absorption and absorption to remove chlorine, taste, odor and chemical contaminants, as well as membrane separation down to .0001 microns. RO membranes remove dissolved solids at the ionic level. No other purification system can provide better removal. Reverse Osmosis Systems provide the best quality drinking water for your family.

Reverse osmosis systems remove the entire spectrum of harmful contaminants.
